

We,

PCS Systemtechnik GmbH | Pfälzer-Wald-Str. 36 | 81539 München

herewith confirm that all PCS products, if not explicitly excluded, comply with the regulations of the following Directives of the European Parliament and of the Council on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) in its latest version:

- EU Directive 2011/65/EU of 12/11/2017 RoHS II
- RoHS Declaration 2015/863 adaptation of 04.06.2015 RoHS III
- EU Directive 2006/122/EU of 12/12/2006 PFOS
- EU Directive 2012/19/EU of 08/13/2012 (WEEE)

According to the respective EU Directive, PCS Systemtechnik GmbH as producer of electronic devices is defined a so-called „downstream user“. Products produced and sold by PCS are non-chemical products without exception, and are defined as „products“ in the sense of REACH. When used as intended, PCS products do not release „chemical substances“. Further, no substances listed on the Candidate List of Substances of Very High Concern (SVHC) are contained in our products. For this reason, PCS is generally exempted from the obligation to register as well as the obligation to issue security data sheets.

As no reportable results exist with PCS, we confirm REACH conformity as of today. If the unlikely event occurs that one of our suppliers or their subcontractors do not comply with the REACH regulations, we will immediately inform you according to REACH - Art 33.

Munich, October 19, 2021

Walter Elsner
Managing Director
