## FOREWORD

# IT IS TIME FOR SECURITY.

We have been developing, manufacturing and distributing products for time recording and access control for more than 50 years. From this long experience, we offer you profound know-how and practical expertise in all aspects of building security, time&attendance and biometrics for high security. As a medium-sized company with over 170 employees in Germany, we are close to you, our partners and customers.

Now is the time to take advantage of digitalization. Design modern working environments and comprehensive corporate security with PCS. The renowned INTUS terminals for time recording and access control as well as the versatile software solutions form the future-oriented basis for your New Work and Smart Building projects.

We set standards in terms of innovation, quality and design. Our driving force is the comprehensive solution for our customers. Through targeted cooperation with industry leaders, we provide our customers with all the components they need from a single source. Because we care about one thing above all: your time recording and access control project. Let's get started together. It's time

Walter Elsner
Chief Executive Officer
PCS Executive Board

Ulrich Kastner-Jung
Managing Director
Head of Customer Services

HISTORY

# ORIGIN AND GROWTH.

PCS was founded in 1970 as Periphere Computer Systeme GmbH with a focus on process control computer and laboratory data systems. In the 1980s, the company specialized on production data collection. In the 1990s, we began developing our INTUS time recording terminals for the growing HR market. We have continuously expanded our range of products and increasingly focused on access control and biometric access control technologies from the year 2000.

Today, we see ourselves as a solution provider for enterprise-wide building security. With the DEXICON software, we have created a platform for networked access control and time recording. This is where all the different threads come together.

## 1970s

Establishment of PCS. In 1973, the company introduced the first German "one-board computer", the CADMUS workstation.

## 1980s

Along with the CADMUS family, the first INTUS terminals for production data collection (PDC) were developed.

## 1990s

INTUS – the terminal family setting new standards in innovation, quality and design.

As a system integrator in the best sense of the word, PCS supplements its own portfolio with products from selected software and technology partners. This allows us to leverage the strengths and agility of the German SME sector. The trusting cooperation with a network of partners results in remarkable innovations and true added value.

We live cooperation and appreciate our partners' great diversity of experience. Working together to deliver the best results for our customers is at the center of our ambition. Our products and solutions have become an important, integral part of modern smart buildings and digital factories.

## 2000s

Evolution of the INTUS family in the areas of time recording and access control.

## 2010s

INTUS 1600PS introduced as the first palm vein authentication access reader for high-security areas.

## 2020s

PCS is becoming a solution partner for time recording and enterprise-wide building security. The product portfolio comprising hardware, software and services is further expanded.

Terminals: It all began with the collection of laboratory and production data in the industrial environment.

INTUS terminals and INTUS readers are the foundation of our brand.

## AMBITION

# INNOVATION, QUALITY AND DESIGN ARE THE GUIDING PRINCIPLES.

We are uncompromising in the development of our hardware. INTUS terminals regularly impress the juries of design awards, but even more importantly for us: they impress our customers with their reliability and ease of use.

Our software also sets standards: our DEXICON and DEXIOS software applications are future-oriented and can be expanded on a modular basis. Thanks to the connection to ERP systems, this is easy to maintain and data-compliant. For example, PCS has had certified interfaces to SAP for more than 20 years. In addition to classic access control, the applications also offer modules for controlling visitor management, organizing plant traffic and managing video surveillance.

Our aim is to create outstanding products with innovation, quality and design.

*„Our aim is for functionality and technology to form a symbiosis.*
*The sophisticated shape of our INTUS terminals goes hand in hand with ergonomic operation. We have proven this with the many design and innovation awards that PCS products regularly receive.“*

Daniel Berning
Head of Product Management

## FOCUS

# DESIGNED FOR A LONG SERVICE LIFE.

The focus of our business orientation is clearly defined: a long service life for our products.

We build our INTUS hardware with selected electronic parts, quality tested in a endurance test, Made in Germany - in our Munich production facility. Reliability is the decisive criterion during operation. PCS products for time recording and access control ensure reliability, even in the event of a power failure.

Our focus always develops through dialog: The DEXICON and DEXIOS applications focus on intelligent functions for the ongoing operation of the security system, e.g. with alarms or emergency plans. New functions are always geared towards the changing requirements of the market. This is how PCS combines sustainability and innovation in product design.

Our partner network has grown continuously over the years. Thanks to a wide range of cooperations, we achieve great variability in the design of our solutions - an advantage for our customers. This allows us to realize projects of all sizes and for all industries, all of which have one thing in common: Investment security thanks to a long service life.

PARTNERSHIP

# CENTERING ON THE “WE”.

*„At the end of the day, it is the trusting cooperation that leads to tailor-made solutions that our customers convince.“*

Markus Knies
Head of Sales

*„Our partners know that with PCS they will receive powerful and innovative products as well as competent, comprehensive support.“*

Alexander Harbecke
Head of Sales

*„The project department stands for tailor-made solutions, professional planning and smooth implementation. We are the movers and shakers who turn your Security concepts into reality. With an experienced team and a holistic approach, we make projects a success.“*

Ralf Gastreich
Head of Projects

Networking is an important building block of success. We rely on a large network of cooperation partners. More than 100 software houses offer solutions for time management, workforce management and workforce scheduling in conjunction with our INTUS terminals for time recording and access control. We will advise you independently of the software because a decision for INTUS hardware equals a decision for investment security.

We have been cooperating with our partners for such a long time – more than 30 years in many cases – that a smooth implementation of your project and optimum integration of PCS's INTUS terminals and the partner's time management software is ensured.

PCS PARTNER

TECHNOLOGY PARTNER

MEMBERSHIPS

Cooperation with technology partners enhances PCS Systemtechnik's solution approach and allows us to offer you selected products supplementing the PCS solutions. PCS works hand in hand with technology partners, especially in areas such as ID card technology, mechatronics, video technology, perimeter facilities or visitor management.

In our complex world, we need institutions that impart knowledge and transfer know-how. PCS is therefore a member of the BHE and the OSS Association, for example.

## TOGETHER

A familial environment, mutual trust and appreciation for each individual are the factors that make PCS an attractive employer. We value a well-balanced mix of generations and open communication among us.

Such a positive working climate favors innovative thinking and a high level of motivation. A large proportion of employees have worked for PCS for many years – convincing proof of the excellent working atmosphere in the company.

## ENVIRONMENT

PCS is committed to the fundamental principles of sustainability and corporate responsibility. We rely on various initiatives to ensure a superior environmental performance of our product range, from energy-efficient operation to avoiding toxic substances in the production of INTUS hardware.

PCS also attaches great importance to the durability of all its devices. To foster sustainability, several device generations may be operated within the same installation

## MATTERS CLOSE TO OUR HEART

We are grateful for our stable economic situation. Therefore, sharing with others is a matter close to our heart for us. We support charitable organizations around our sites and actively engage in selected international projects our employees have personally recommended to us.

IMPLEMENTATION

# EXPERTISE-DRIVEN IMPLEMENTATION.

You have chosen the PCS solution. Our PCS Customer Services will accompany your project through the entire product life cycle. Experienced and competent project managers are at your side during implementation: from the on-site inspection, consulting and from planning to installation of the hardware and individual configuration of the software, you will receive professional support.

It is important to us to advise and support you competently, quickly and flexibly in all matters. Precise project documentation creates transparency and planning security for the future. Service and maintenance of your system by PCS is a guarantee for a long service life.

Our expertise lies in implementation.

PCS

# WE ARE YOUR SOLUTION PARTNER FOR TIME MANAGEMENT AND BUILDING SECURITY.

## WE are PCS.

We live a culture of appreciation in our team. Our employees work together on an equal footing and in flat hierarchies. Agile development, personnel development and transparent bonus payments are key elements of our corporate culture. That is why you can be sure that your contact persons at PCS will remain the same for many years.

One thing is clear: We take time for your security.

Sincerely yours: PCS Systemtechnik.
