

INTUS PEGASYS CABINETLOCK

Mechatronic access control

-
- Plastic housing
 - Battery life up to 80,000 bookings
 - Simple Quick-Click mounting without drilling
 - Suitable for all types of lockers
 - Emergency power supply via USB
 - Fully integrated into access control
-

Time for security.

The INTUS PegaSys CabinetLock can be installed quickly and easily without drilling. The flexible adjustment of the various bolt inserts allows the lock to be optimally aligned in any locker door.

If, despite the long battery life, the batteries run out, an opening can be made via USB emergency power supply. In addition, the pre-tensioned latch spring prevents the latch from being blocked, e.g. if objects press against the door from the inside when the locker is full.

INTUS PEGASYS CABINETLOCK

General characteristics

- Made in Germany
- Visual and acoustic signaling
- Housing: plastic

Configuration

- Up to 80,000 bookings per battery cycle or 5 years stand-by
- Memory capacity for bookings up to 512
- Degree of protection: IP40
