INTUS 5600

Time recording terminal with a maximum of technology and free space

- Customizable user interface
- Touchscreen over the entire device
- Connects to up to 16 access readers
- WiFi or mobile communication as an option
- Service-friendly AutoClone functionality
- Integrated reader for RFID/Bluetooth®

The terminal is designed exactly as you need it: self-explanatory touch operation according to your specifications, integrated reader, speaker, ample memory, optional barcode scanner. The combination of a large functional surface and a brilliant colour display leaves room for individual design. In your design, with your logo, your pictograms or your texts.

Use the writing function to write data to the company badge. This makes it easy to update access profiles for offline access control.

We have compiled all the relevant documents on our website.
Scan the QR code and get started.

Recorded times are the basis for sophisticated time management projects. In our excellent partner network you will find the right solution for efficient HR processes, personnel scheduling or your workforce management.
